

Meta Ads Quick-Start Checklist

Bonus 1 · Meta Ads Mastery by Rishabh Shukla

1. Business Manager Setup Checklist (12 Points)

- Create your Meta Business Suite account at business.facebook.com
- Enter your business name exactly as your Shopify store name
- Use a business email for setup, not a personal Gmail
- Complete business verification when prompted
- Create or connect your Facebook Business Page
- Add a professional profile picture and cover photo to your Page
- Create a new Ad Account inside Business Manager
- Set currency to INR — this cannot be changed later
- Set time zone to Asia/Kolkata — this cannot be changed later
- Add a backup admin to your Business Manager
- Add a payment method (card, UPI, or net banking)
- Set up auto-recharge with a ₹2,000 minimum buffer

2. Pixel Installation Verification (8 Steps)

- Go to Events Manager → Connect Data Sources → Web
- Select Meta Pixel and name it after your store
- Copy your Pixel ID (a 15–16 digit number)
- Paste it in Shopify: Online Store → Preferences → Facebook Pixel
- Install the Facebook & Instagram app from the Shopify App Store
- Enable Conversions API inside the same app
- Visit your own website and confirm PageView events appear in Events Manager
- Test an Add-to-Cart and a Purchase event before you launch any ads

3. Campaign Launch Checklist (14 Steps)

- Meta Pixel installed and verified
- Purchase event firing correctly on your Shopify store
- Facebook Page live with a professional photo and cover
- At least 3 ad creatives ready (image, carousel, or video)
- Ad copy written for each creative using the AIDA formula
- Payment method added with ₹2,000+ balance
- Store and product page live and mobile-optimised
- Cold, Warm, and Lookalike audiences created
- Campaign objective set to Sales (never Traffic or Engagement)
- Correct Pixel and Purchase event selected at Ad Set level
- Placements set to Advantage+ Placements (recommended)
- Daily budget set for this ad set

- Headline, primary text, and CTA button (Shop Now) added
- Ad previewed on mobile before publishing — 90% of views are mobile

4. Weekly Campaign Review Checklist

- Check ROAS — target 2x minimum, aim for 3x+
- Check Cost Per Purchase against your break-even point
- Check CTR — below 1% signals a creative problem
- Check CPM — healthy India range is ■60–120
- Check Frequency — keep it below 4
- Identify your best-performing ad set and creative
- Turn off any ad with CTR below 0.8% or ROAS below 1.5x
- Plan a creative refresh if Frequency is climbing

5. Creative Testing Checklist (8 Elements)

- The hook — does it stop the scroll in 3 seconds?
- The headline
- The primary text, structured with AIDA
- The visual format (UGC, testimonial, before/after, text-on-screen)
- The CTA button text
- How it looks in mobile preview
- The placement — Feed vs. Reels vs. Stories
- Whether the landing page matches what the ad promises
